

Jordan Avery

St. Petersburg, FL · (555) 010-2233 · jordan@example.com · github.com/jordan-avery

SUMMARY

Software engineer with eight years of experience building distributed systems, developer tooling, and data platforms. Enjoys turning ambiguous product problems into reliable, well-instrumented services and mentoring engineers along the way.

EXPERIENCE

FirmPilot
Senior Software Engineer
Built distributed systems for ingesting and ranking legal marketing data across thousands of client sites.

2024 – Present
St. Petersburg, FL

- Designed an event pipeline processing 40M records per day with exactly-once delivery guarantees and replay tooling.
- Led migration of the reporting stack to columnar storage, cutting query latency by 70%.
- Mentored four engineers and introduced a lightweight design review process.

Northwind Analytics
Software Engineer

- Built feature one: a self-serve dashboard builder used by 300+ customers.
- Built feature two: streaming alerts with sub-second evaluation.

2019 – 2024
Tampa, FL
